

LEED V4 vs. LEED 2009 Construction and Demolition Requirements Summary

LEED V4 MR Prerequisite 2: C&D Waste Management Plan *New Requirement*

- Develop and implement a Waste Management Plan
- Establish waste diversion goals
- Identify 5 or more materials to be diverted
- Specify comingled vs. source separated
- Determine where materials will be taken
- Provide a final summary report including disposal and diversion rates

LEED V4 MR Credit 5: C&D Waste Management *Changed Requirement*

- Option 1 - Path 1: Divert 50% from landfill – **1 Point**
 - Must include at least 3 material streams
- Option 1 - Path 2: Divert 75% from landfill – **2 Points**
 - Must include at least 4 material streams
- Option 2: Reduce total waste material to less than 2.5 Lbs. Per square foot of floor area. - **2 points**

*Land-clearing debris, soil, and Alternative Daily Cover are not considered diverted waste streams
It is not known at this time whether LEED V4 will allow Exemplary Performance points for 95% recycling*

LEED 2009 MR Credit 5: C&D Waste Management *Simple waste management plan is required.*

- Divert 50% from landfill – **1 point**
- Divert 75% from Landfill – **2 points**
- Divert 95% from landfill – **1 Point Exemplary Performance**
