City Energy Project

A groundbreaking national initiative to improve the energy efficiency of buildings in 10 major American cities.
- Energy Benchmarking & Reporting
- Lead by Example
- Challenge Programs, Recognition & Awards
- Energy Efficient Leasing Terms & Financing Mechanisms
- DOE’s Energy Data Accelerator initiative
- Building Operator Certification
- Regionalization of Energy Efficiency
Energy Empowerment Ordinance

October 2014 – Start the Benchmarking Ordinance process
December 2014 – Working Draft Ordinance presented to CEP AC

January 2015 - Present the Working Draft Ordinance to varies stakeholders
March 2015 – Held a public listening session

April 2015 – Draft Ordinance docketed
June 2015 – Energy Empowerment Ordinance passed by Kansas City Missouri City Council
Energy Empowerment Ordinance

• Who is Subject to the Ordinance?

• Who is Responsible for Complying?

• How do I Comply?

• What are the Compliance Deadlines?
Energy Empowerment Program

June 2015 – Continue working with CEP AC & stakeholders on proposed outreach & implementation

October 2015 – Energy Empowerment Program’s outreach launches
Energy Empowerment Program

http://kcmo.gov/kcgreen/benchmarking

On June 4, 2015, Mayor Sly James and the City Council of Kansas City adopted an Energy Empowerment Ordinance to improve the city’s management of resources by requiring owners of large buildings to benchmark and report their energy and water use. The goal is to help businesses and residents save money on their utility bills and create local jobs in energy efficiency. This information will also help our local energy utilities and the City government target future financial and technical assistance.

If you own or manage a building in Kansas City that exceeds 50,000 square feet, please “Claim Your Building” to receive correspondence about the Energy Empowerment Ordinance.

If you are a building owner or property manager, please Claim Your Building using the interactive map. Double-click on the red circle and then double-click again on the location of your building. Once you find your building, click on the blue dot. Data for your building, including your Building ID and square footage, will appear below the map. After finding your Building ID, then complete the form below to let us know that you own or manage the building. (Note: it helps to use your scroll bar rather than mouse for the map feature).
Create healthier and more prosperous communities by improving the energy efficiency of large buildings
Workshops & Seminars

- Speed Green Networking
- Mayor’s Energy Challenge Recognition Event
- BOMA 360 Certification Workshop
- Energy Summit – From Benchmarking to Retrofits
- Business Case for Energy Efficiency Panel
- Lighting Day Workshop
- Introduction to KCP&L’s AccountLink Advantage
Longevity Planning – 2017+

Permanent energy efficiency resource
• Local, one-stop shop
• Providing Technical Assistance, Education & Training, Outreach & Community Engagement, Stakeholder Coordination
