

Register now for the annual Green Schools Quest: A Project-Based Challenge! This program of the U.S. Green Building Council-Missouri Gateway Chapter invites PreK-12 schools in Missouri and Southern Illinois to devise and implement creative, effective and no/low-cost sustainability practices with the help of a Green Mentor.

Each participating school forms a **team of students** (can be a club, class, grade level, or entire school) which is organized by one adult member of a school's community (teacher, administrator, staff, or parent) who serves as their team's facilitator. The school is then paired with a **Green Mentor** from the community who helps with project ideas and resources.

Teams engage in their chosen sustainability project from October through March and submit their outcomes for a chance to win. Projects must be new or major extensions of existing initiatives at the school. Teams are encouraged to integrate multiple principles from the **Rainbow of Sustainability** into their projects: Importance of Place, Interconnectedness, Respect for Limits, Systems Thinking, Cycles, Social Justice, and Global Citizenship.

### Project Ideas Include

- Energy & Greenhouse Gas
- Water Conservation & Quality
- Food Garden
- Habitat Restoration & Biodiversity
